One for All – All in One.

The new 2LINE Helios BOX

2LINE Helios BOX – Your benefits

Functionality

all expansion types are possible without pre-configuration

Symmetry

symmetrical design for maximum flexibility during installation and cable overlength storage

Patch panel / splice tray

separation of patch and splice area allows connection without specialised personnel

Cable trays

patch cable storage directly in the box thanks to integrated cable overlength box

2LINE Fibre optic termination point

to terminate the optical fibre in the building

2LINE Helios BOX

The 2LINE Helios BOX is an optical fibre termination point for terminating the optical fibre in the building.

Advantages

- accommodates up to 13 couplers (LC duplex, SC or E2000)
- holds 28 crimp splices or 14 shrink splices
- can be extended to 112 crimp splices or 98 shrink splices by installing 7 cassettes
- separation between patch and splice area by inner cover
- optimised for installations with pre-assembled cables
- versatile options for loose tube and cable overlength storage

Scope of delivery

- 2LINE Helios BOX
- mounting material
- assembly instructions via QR code

Dimensions

- size: 384 mm x 235 mm x 113 mm
- weight: approx. 1.25 - 1.4 kg

Optional accessories

- inner cover
- couplings and pigtails
- lock
- splice cassettes
- label (printing according to customer requirements possible)
