

2LINE Hermes BOX

Customer line termination

2LINE Hermes BOX

Article no.: 2LINE Hermes BOX

The 2LINE Hermes BOX is an optical fibre termination point for terminating the fibre in the building. All features and functions for a professional transfer and termination point of an FTTx network are represented in a robust plastic housing.

Picture may differ from selected product

- **Accommodates max. 6 adapters and 24 splices**
- **Storage capacity of 6x SC pigtails or 6x E2000 pigtails or 12x LC pigtails**
- **Flat and robust design for wall fixation**

Facts

Advantages:

- Optic fibres are protected within the housing and guided with bending radius and the possibility to store excess fibre lengths
- Interchangeable splice holder for storing shrink or crimp splice protection elements
- Guided cable entry from below with sealing and integrated or additional cable strain relief
- Possibility of using commercially available single-pass seals in the housing
- Cover closure self-locking, grooved or Torx screw and sealable
- Cable/tube entry max. \varnothing 12mm from below
- UV- and weather resistant

Scope of delivery:

- Wall fixation material
- Optional: Adapters and pigtails included, customer logo, 2LINE ZAF

Dimensions:

- HxWxD[mm]: 235x155x35

Tests/Standards:

- Impact resistance class IP54 (for internal adapters)
- Impact resistance class IP20 (for external adapters)
- Fire resistance class UL94 V-0

Features

Splice count: 12
